

UNIVERSITY OF MAINE AT PRESQUE ISLE

181 Main Street  
Presque Isle, Maine 04768

## *Pest Control Management Program*

Written 2010

### Purpose:

To insure an optimal degree of safe and proper usage of pest control measures designed to eliminate pest and vectors from University buildings and grounds safely.

### Scope:

The University will contract pest control services from a reputable and licensed contractor with considerable experience with an institutional environmental setting.

### Compliance Statement

Guidelines used in this policy are developed for current standards from the appropriate regulatory or directing agency.

## General Requirements

The University will maintain a Pest Activity Log. The log will determine the Date, Pest Type, The Location, and The Person Reporting the Condition. The Activity Log will be maintained in the Pest Management Logbook.

The Pest Management Logbook will also contain the individual service reports that will be signed by the contractor's representative and the owner's representative. The report will contain the date of service, location of service, type of service and any notable fact.

The Pest Management Logbook will also contain a Pesticide Usage Log.

The Pest Management Logbook will also contain any and all Material Safety Data Sheets of chemicals used by the contractor.
