

and do more in a day I do I
hope you will not get tired of
waiting but had one I will
be with you as soon as the weather
gets in that I ain't to start.

I thought we had cold
weather down there before I came
away but it is not a comparison
to what we are having up here now
and the wind blows like a heavy
rain almost all the time

But I have not time to
write more at present and
rather wish you could hardly read this
it is written so faintly but if you
will keep it till I come and not let
it get cold I will try to read it
for you I repeat evening

From your friend
in haste W. H. Sears

Mr. Richards,
Dear Sir,

I have been obliged to let you know
that I am a lame and well I suppose
I begin to think I have left you
far good but this is not the case
I have had no opportunity as far as
was in hopes to start next Monday
but it is not probable that I shall be
able to get away till one week before
next. However as the matter is so
very odd I do not think it is prudent
for my wife to be out but I hope it
will be convenient by that time
But the dogs are growing
larger and it will be sooner than
and I can see to make comfortably
